

ACTIVITY #1: Colour Sorting Game

Objective: To develop how a student understands colour

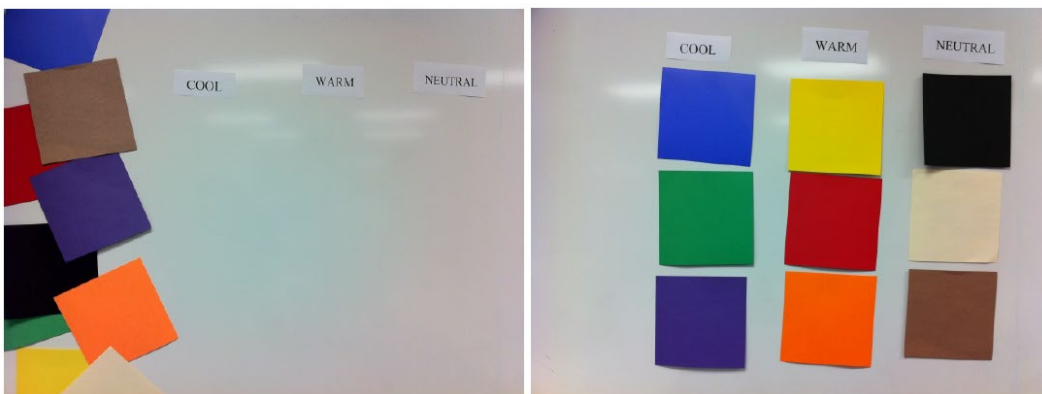

Curriculum Connections:

- Explore the different ways we classify colours
- Examining how colour can be used to influence thinking
- Review the terms and meanings of colours
- Explore how colour can be used to heal

Materials needed: cutouts of construction paper

Instructions:

1. Write out some basic colour terms on paper and attach them to a wall or on a table. Use the following terms: cool, warm, neutral, primary, secondary, happy, sad, mad or any other terms you think colours can be categorized into.
2. Ask the student to place a colour underneath each category that they think the colour belongs to.
